HAMMOND: THE ICON RETURNS

The Real Thing.

The first Hammond organ was built over 75 years ago. Since then, the Hammond organ has been the centerpiece of Jazz, Gospel, Rock and Latin music. From Jazz giants like Jimmy Smith, to English rocker Procol Harum playing "A whiter shade of pale" to Latin with Santana's "Black Magic Woman," the list is growing in strength as the modern players discover the 'Hammond' sound. Matched with the famous Leslie speaker, Hammond gives a huge character that simply can't be imitated. Today's range of Hammond instruments includes models for stage, studio, school, chapel and home. Drop in to see the full range and experience the thrill of pure Hammond sound today.

**HAMMOND:
THE
NEW
PORTABLE
ORGAN**

Hammond introduces one of the finest gigging keyboards ever made.

Each SK model incorporates the three most sought-after Hammond organs, named B Type 1 (Hammond in pristine condition), B Type 2 (Hammond in very used condition) and Mellow B. Combined with the authentic Leslie simulator, the SK keyboard gives full, iconic Hammond sound.

A mighty array of popular organs is built in, with accurate replications of the Vox Continental, Farfisa and majestic classical pipe organs. You now can recreate the immortalised sounds of The Doors, Pink Floyd, Led Zeppelin, the Beatles and much more, with just one keyboard. Or use the authentic Hammond drawbars to create your own unique sound.

The gigging musician is spoilt for choice, with presets, effects and a large number of useable additional sounds including acoustic pianos, electric pianos, strings, clavinet, synths and brass etc. More can be downloaded from the Hammond site!

Top of the range model SKx features complete sets of drawbars for upper, lower and pedal, plus additional sound layering capabilities for percussion and orchestral voices.

With a starting weight of just 7kgs, and incredible deals at your Hammond dealer, you would be crazy to play any other keyboard.
